

TV Video Signal Distribution Buffer

K-6034, K-6034(10CH)

K-6034 is distributing S-Video (Y/C) and audio signal without amplification, attenuation and distortion, it is signal distribution equipment which is suitable to PDP and TV.

Specifications

■ Signal Output

Video band width: 250 MHz, -3.0dB

Audio band width: 20 KHz

Video Output Z: 75 ohm

Video output level: 1.0 Vp-p

Audio output level: TTL

Output level control: rear panel VR

Output connectors: S-Video (Y/C)

Output Channel: 5 channel, 10 channel

■ Signal Input

Video Input signal:

S-Video BNC input

Audio Input connectors:

R,L RCA input

■ Miscellaneous

AC Mains

Frequency: 50 ~ 60Hz

Voltage: 90V ~ 260V auto switching

Power consumption: 20VA(Max)

Operating Humidity/Temperature

80% / -10 °C ~ 60 °C

Size

Unpacked(H X W X D):

92 X 202 X 186mm

Features

- 250 MHz Video Bandwidth (-3.0dB)
- 20KHz Audio Bandwidth
- 75MHz -1.0 dB Attenuation
